

NO MORE PLASTIC

Introduction

This document is a drawing created / made by Amy Sachar in 2010

This picture is on the theme of ecology

It is about pollution due to plastic

Description

In this picture, we can see the Earth represented as a sad person.

She is holding a sign/a board on which it is written « no more plastic »

Which means that she can no longer bear the pollution created by plastic

It means that there is too much pollution, too much plastic and she can't take it anymore.

She asks us to stop throwing plastic on her because it hurts her.

She is sad because we don't take care of her and we do not pay attention to her.

She is holding a sign to alert/warn the human kind

She calls for help because she's suffering

She is sad because she trusted us but we didn't listen to her therefore she begins to die.

Conclusion

This drawing was created with the aim of making people think about the environment.

It is supposed to make people react against pollution

The aim of this image is to raise awareness that plastic destroys our planet.

This image denounces the pollution due to plastic.

This picture symbolizes that the planet is in danger.

It shows that the earth is overrun by plastic because of humans.

The message of the artist is that the planet is dying because of us. We consume far too much and use too much plastic. People pollute nature with a lot of plastic. The plastic in the sea kills fish because people don't pick up their rubbish. Because of all this plastic, the earth starts to turn into a giant trash can. People have to be aware of the consequences of their actions

10 years later, it is the same problem. We don't care about oceans, land, animals... life !

We must protect the environment. We must be careful not to pollute the environment.

We must pay attention to the planet and recycle our rubbish.

It is necessary to stop polluting for the good of our planet.

We have to protect our world and stop buying plastic.
