

Wildlife wonders of the Scottish Highlands

The Scottish Highlands are well known for their beautiful, dramatic landscapes and rich history. Many famous wild animals also live here.

Highland cows have long hair and big horns. They are big and friendly, but also very strong¹ because they live outside during the freezing cold temperatures of a Scottish winter.

The Highlands are also home to red foxes and deer. Deer are big animals with long antlers². There are also wildcats. They look cute, but they have very big teeth!

↑ Loch Ness and Urquhart Castle

Then there's the mystery of the Loch Ness monster or "Nessie". She is a big creature with a long neck³ and four short legs. She likes swimming in the deep waters⁴ of Loch Ness. People travel from all over the world to see this mysterious creature. Do you think she's real or just a myth?
